PROFESSIONAL CONVERSION (POSTGRADUATE)

The professional conversion program is addressed to professors in the pre-university education system who want to specialize in another field than the one registered on the bachelor's degree.

“The Faculty of History is a pleasant working environment, a space for dialogue and professionalism and a united community of students and professors. Besides scientific performance, the academic staff ensures also pedagogical excellence, proving a significant respect for their students and an impeccable moral status. While the BA programme set the rigorous knowledge of the field, the MA studies offered me a flexible working schedule, oriented towards individual study and research. At the end of the almost four years within the Faculty of History, my only regret is that time flew too fast and I don't have the occasion to re-experience the beautiful moments lived in the first years of faculty. I recommend with all my heart to any high school graduate, either passionate about history or, in general, about the humanistic side of knowledge, to join the community of the Faculty of History, where it surely will experience a *historical* experience.” [Teodora Popovici, MA Student]

Opportunities for Students

scholarships

- Scholarships for scientific performance
- Olympic performance scholarships
- Merit scholarships
- Scholarships for students domiciliated in rural areas
- Social and occasional social scholarships
- Scholarships awarded to students with remarkable results in cultural or sports activities
- Special scholarships for extracurricular activities

accommodation

- consultants in various fields, including public administration (on topics of history, art, international relations, and European studies)
- journalists: cultural and political written and audio-visual press

“My adventure at the Faculty of History began the day I went to submit my file, completely confused and scared of what was to come. But when I stand on the stairs of the Faculty, I felt that I had found the right path and place. At the beginning of the academic year, I met my colleagues, who were to be the family with whom I grew up in the coming years. The professors exceeded all my expectations and became our mentors. Firstly, I did not think I could handle it, but I learned something from every experience and opportunity I came across, and in the end, everything turned out to be constructive. The most important aspect in the Faculty is represented by the students, who create the typical atmosphere of closeness and the feeling that we are all at the beginning of the road. Another very important help was the History Students Association «Dacia», which supported us in all the problems we faced and made us feel very welcome and helped us with the enrollment, with the accommodation in dormitories, with the adaptation and, in addition to all this, I participated in a lot of fun activities organized by them. Looking back, I can say that I am sure of the decision I have made, and the academic environment here is very, very special.” [Alexandra, PhD candidate]
